

Employer Name	Describe the externship experience you plan to offer at your worksite.
Lee TranServices	<p>Our organization collaborates with companies in the transportation sector, offering guidance on adhering to Federal and State Regulations concerning their vehicles and drivers. We provide a diverse array of job opportunities, including data entry, software programming, and client service roles.</p> <p>Previously, we were engaged in the program that enabled a teacher to immerse in the operations of each department within our company. This initiative offered a comprehensive understanding of the various career paths available within our organization. Through this program, the teacher first received an overview of our company's history, culture, and values. Following this introduction, the teacher was given the opportunity to spend time in each department. This included receiving an overview from the department supervisor and shadowing various positions to gain a firsthand experience of our day-to-day operations. The program proved to be immensely beneficial, culminating in a positive experience for all parties involved. Notably, it led to two young men joining our team as paid interns until their high school graduation. This initiative underscores our commitment to fostering educational opportunities and providing valuable insights into the professional environment we cultivate.</p>
